EXPERIENCE

GEEKS FOR GEEKS | TECHNICAL CONTENT WRITER

Apr 2023 - Present Link: [Articles](#)

• Wrote **3 technical articles** and **tutorials** on various topics related to computer science and programming, such as:
• DevOps (e.g. Docker) • AWS (e.g. VPC)

GOOGLE SUMMER OF CODE'22 | CONTRIBUTOR

Jun 12, 2022 – Oct 19, 2023 | Github

I was the 2nd Contributor of the project, under the GSoC'22 @CCExtractor. I was responsible for maintaining CI/CD pipeline, which resulted in smooth development and I also fixed some bugs that occurred during the development of the Project.

HACKTOBERFEST | PROJECT MAINTAINER

Oct 2022 – Oct 2022 | Github

• I mentored approximately 15 first-time contributors Guiding them through the process of open-source development. I explained the principles of open-source and assisted them in getting their pull requests merged successfully. It was incredibly rewarding to witness their growth and contribute to the vibrant open-source community.

PROJECTS

UNI-SHARE FLUTTER | FIREBASE | GITHUB

Notes-Share is a media sharing app for student where student can share assignment, notes, tutorial, notice, etc in any format with fellow students publicly specific to their institute or in a private chat.

AYUMI GPT FLUTTER | OPEN AI | GITHUB

The ChatGPT Mobile App is a chatbot mobile application that enables users to have interactive conversations with chatbot powered by the OpenAI GPT (Generative Pre-trained Transformer) model. The app is designed to provide a personalized and conversational experience, bridging the gap between traditional chatbot and human conversations
